#### About:

FRP (Fiberglass reinforced plastic) cover is one of the main products supplied by ARGOS FRP Pty Ltd (Australia). These quality covers get manufactured at Malaysia in the ISO 9001 certified facility of YUNKU FRP Sdn Bhd (Manufacturing partner of ARGOS FRP Pty Ltd).

These covers are widely used in odour control system, particularly Clarifier tank in large diameter, ranging from 20 meters to 33 meters. Thanks to the FRP's excellent chemical corrosion resistance, lightweight high strength characteristics, it can be used in many harsh environments, such as chemical plants, sewage treatment plants, oil and gas plants, etc.

All the covers we have supplied, have been well designed and calculated by professional engineers in term of the structural strength and chemical resistance in various application. In the fabrication, all the cover segments are produced in precise mould by our experienced and skilful production team. Type of resins and fiberglass are carefully selected and mathematically calculated to make the best construction – lightweight yet high strength.

Note: Custom made solutions are available. Please feel free to discuss with us.

#### Advantages of FRP:

- ✓ Weather resistance
- ✓ Light weight
- ✓ High strength
- ✓ Chemical corrosion resistance
- ✓ Easy installation
- ✓ Low maintenance cost
- ✓ Long service life
- ✓ Custom made shape
- ✓ Elegant and smooth surface
